

Natural Therapy

I am presenting and performing a therapy based on undeniable success over many generations a phenomenal method of healing and restoration function of the Central Nervous System (CNS).

In a nutshell - the therapy is 100% safe & doesn't involve an oral intake of any medicines, rather it uses natural healing abilities of certain semiprecious metals & their ability to repair & reactivate damaged nerves.

The treatment effectively treats, eliminates and in some cases even cures a great number of psychological and neurological issues.

Isabella uses a melting form of semiprecious metals that make it possible for her to provide a unique healing effect on damaged nerves in order to reactivate and restore the right nerves in the brain that have been affected.
